World Childless Week 2019

16-22 September 2019

World Childless Week is an online event for our community, their friends, colleagues and family. Our aim is to offer support, raise awareness and break down barriers to create greater empathy and understanding.

1 in 5 women in the UK over 45 don't have children, 10% are childless by choice, 10% are childless due to infertility and 80% childless due to circumstances (Keizer, R, 2010). You will be working with a man or woman who is childless not by choice but it's probably the biggest diversity issue you've never heard of.
